

Section I: Public Water System Information				Section II: Non-Lead Service Line Inventory Summary Information - REQUIRED FOR ALL SYSTEMS			
PWSID:		System Name:		Enter the Total Number of Service Lines within the Distribution System:		33656	
Contact Person:		Phone:		Enter the Total Number of Service Lines that are Known to be Non-Lead:		33648	
		Email:		Describe below ALL of the methods used to make the non-lead service line material determination: Physical inspection on both sides of the meter pit with documentation for every service line in the City. Physical inspection inside some homes at private service line entry into the building. Historical records review.			
*System Authorized Signature		Printed Name					
*Signature not required if submitted online.							

Section III: Service Line Inventory Site Information for Lead, Galvanized Requiring Replacement, and Lead Status Unknown - NOT REQUIRED IF SYSTEM IS ALL NON-LEAD
Information on each Lead, Galvanized Requiring Replacement, and Lead Status Unknown Service Lines must be entered below.
Use Drop-downs where available. Based on the service line information input below, the form calculates the material classification of each full service line.

Service Line Material Classification	Definition	CALCULATED Total Number of Service Lines	CALCULATED Additional Information Based on Form Inputs
Lead	Any portion of the service line is known to be made of lead (NOT including lead connectors).	0	Form is complete - No Additional Information is Required, Submit Form to Portal in Excel Format
Galvanized Requiring Replacement (GRR)	The service line is not made of lead, but a portion is galvanized and the system is unable to demonstrate that the galvanized line was never downstream of a lead service line.	1	
Lead Status Unknown	The service line material is not known to be lead or GRR. For the entire service line or a portion of it (in cases of split ownership), there is not enough evidence to support material classification.	7	
Non-Lead (Not Required to be Reported Below)	All portions of the service line are known NOT to be lead or GRR through an evidence-based record, method, or technique.	0	The System is required to notify consumers with a lead, GRR, or unknown service lines within 30 days and annually thereafter. A Lead Service Line Replacement Plan will be due in the future

Service Line Information														Optional Additional Fields for Service Line Information (e.g. Service Line Diameter, Install Date, etc.)			
Unique Service Line Identifier	Location Identifier or Site Address	Connector Type (Likely Future Requirement)	Line Ownership	Current System-Owned Service Line Material	Was System-Owned Service Line Material Ever Lead?	Customer-Owned Service Line Material	Verification Method for System-Owned Service Line Material	Verification Method for Customer-Owned Service Line Material	CALCULATED Service Line Material in Inventory	Building Type	Is a Point-of-Use or Point-of-Entry Device Present?	Does the Interior Building Plumbing Contain Copper Pipe with Lead Solder from before 1988?	Current Lead and Copper Sample Pool Site?	CALCULATED Site Tier Level (If Community)	Data Field 1: [ENTER FIELD NAME HERE]	Data Field 2: [ENTER FIELD NAME HERE]	Data Field 3: [ENTER FIELD NAME HERE]
