

CONSTRUCTION BEGINS SOON

CONSTRUCTION OF THE WATER SUPPLY LINE BEGINS IN FEBRUARY.

To prepare the site for construction, several trees that pose a risk to construction within the surrounding area will be removed near Betty Adams Elementary. Tree removal takes place in the winter when trees are dormant to protect neighboring trees and minimize the impact on migratory birds.

Work is expected to begin as soon as Monday, February 9, and is anticipated to last for one week. For trail user safety, there will be temporary trail closures with detour signage posted for navigation. New native trees will be planted once the project is completed.
