

## **SLBT Update for the Week of August 19, 2019**

The Tag Committee will be meeting this coming Thursday after the internal task force has met and discussed the potential solutions endorsed by SLBT.

We are currently vetting a new cable/swage that was given to us by a member of the Tagging Committee to see if it can be taken apart and put back together with no detection. We should have results this week. We are also working on a larger T-Bar that can be utilized if we go with the integrated Nokē cable/lock system.
